Experience

Lead Website Engineer (Contract), Global Exposome Forum (Current)

- Leads the design and structuring of the Global Exposome Forum institutional website as an organizational hub, integrating visual identity, programming, interactivity, and information architecture.
- Develops and implements features for managing strategic content, including working groups, event video archives, institutional announcements, and mission and program pages.
- Ensures an accessible, responsive, and user-centered digital experience, focused on collaboration, knowledge dissemination, and strengthening the Forum's global institutional presence.

Communications Assistant (Freelance), Center for Alternatives to Animal Testing, Johns Hopkins University (Current)

- Collaborates with researchers and staff to produce scientific audiovisual content promoting alternative testing methods and the CAAT brand.
- Video and photography capture for the organization's website and social media.
- Manages audiovisual equipment at international events organized by CAAT.
- Participant registration and general support for events and fundraising campaigns.
- Creates infographics and promotional materials for CAAT-sponsored events.
- Handles confidential information responsibly, ensuring proper archiving practices and non-disclosure.

Multimedia Specialist (Contract), Johns Hopkins Bloomberg School of Public Health (Completed)

- Produced audiovisual content to promote public health initiatives and scientific research.
- Captured, edited, and archived symposia, conferences, and academic events.
- Provided full support for the audiovisual production workflow, from planning through post-production.

Independent Contractor (Temporary Role), International MPS Society (Completed)

- Designed printed materials and provided support for international scientific events.
- Event photography, speaker coordination, and technical production support.
- Curated, edited, and delivered videos of presentations and conferences.

Video Editor (Contract), Exposome Moonshot Forum (Completed)

- Edited videos for scientific forums and institutional events.
- Provided technical and operational support for in-person and remote events.
- Managed media, secure file transfers, and digital asset organization.
- Supported production of graphic materials and digital content.

Radio Broadcasting, WLUW 88.7FM (Completed)

- Live improvisation and on-air communication during broadcasts.
- Managed live multi-channel audio and ensured compliance with FCC guidelines.
- Collaborated with artists, producers, and station staff during interviews and special presentations.
